EDUCATION

Cornell University

Ithaca, NY

Bachelor's degree in Information Science | GPA: 3.88/4.0

Aug 2023 - May 2026

- **Minor:** Game Design
- **Relevant Coursework:** Object-Oriented Programming and Data Structures, Web Design and Development, Consequences of Computing, Design Visualization and Graphics, Computer Game Architecture, Sound Design, Intro to IOS Development

WORKING EXPERIENCE

Dot Point Capital

Hong Kong, China

Software Development Engineer Intern

Jan 2025 - Apr 2025

- Designed a Workflow using an LLM with 11 prompts using FastGPT on Confidential Information Memorandum Teaser generation, significantly facilitating project pitching towards firm's partner.
- Tested API endpoints with Postman to ensure stability, successfully integrating the LLM Models into business web app backend with consistent JSON responses with data for graph generation and front-end information renderings using Spring Boot and React Frameworks
- Translated content and linked 20 JSON files to support dynamic bilingual rendering for the landing page.

Tradox Tech

New Jersey, NY

Full Stack Software Development Engineer Intern

Dec 2024 - Jan 2025

- Designed a pipeline with 400+ lines of code using requests, pandas, and psycopg2 to scrape live financial news data into a **Postgres** database and applied sentiment analysis with Natural Language Processing using **NLTK**.
- Developed Web App interface with **Flask** and **HTML**, **CSS**, and **JavaScript** with 1700+ lines of code, allowing user authentication, account password reset, interactive 500 data retrieval, and interactive data tree-map graphics.
- Implemented a trading strategy using Backtrader with Interactive Brokers' API for real-time testing in a paper trading environment, including strategy development, API integration, and live performance monitoring.

PROJECT EXPERIENCE

Unannounced Project: Public Toilet Stimulator

Ithaca, NY

Game Designer, Programmer & Artist

Jun 2025 - Current

- Led the ideation and core gameplay design of a tower defense/simulation game where players strategically purchase and place toilets within a constrained space, then assign suitable customers to maximize profits.
- Independently designed a turn-based non-digital board game prototype to test core mechanics and pacing.
- Self-taught Unity and C#, and developed a single-level digital prototype featuring 3 toilet variants and 4 customer types to conduct early gameplay testing and iteration.

CiGA 2025 Game Jam: E-I-E-I Moo: <https://andypang1010.itch.io/e-i-e-i-moo>

Ithaca, NY

Character & Animation Artists

Jun 2025

- Led the ideation and game design of a speed centered gardening stimulation with a thematic focus of "Everything is Alive" within 48 hours.
- Independently designed and Animated 5 characters and objects with Procreate with at least 3 variant animations for 2 of them.
- Organized the art progression and development progression for the 48 hours' time range to deliver final product promptly and with high quality.
- Collaborated with Programmers to resolve and debugged shaders and lighting in Unity to enhance visual consistency in final product.

Toymare: <https://gdiac.cs.cornell.edu/gdiac/showcase/gallery/toymare/>

Ithaca, NY

Co-Project Manager, Programmer, Artist

Jan 2025 - Current

- Developed a ¾ top-down perspective action + puzzle shooter game with Java using LibGDX with a team of 7 that cooperates puzzle solving and 3/4 person shooting ensuring a intriguing and exciting game play.
- Implemented a comprehensive **Finite State Machine (FSM)** to ensure smooth functionality of player's and enemies' behavior.
- Engineered a robust game engine that will read JSON from Tiled forming 16 different levels for the game; Designed 12 of the 16 levels that ensures smooth level progression and a optimal player learning curve.
- Designed menu, level selection, game, win/lose and cut scene's UI arts with Procreate, AI and implemented all animations in Java with FSM; established a professional and smooth visual display.

DGA Studio Team Project: Grub Bug: <https://dgacornell.itch.io/grubbug>

Ithaca, NY

Character & Animation Artists

Aug 2024 - May 2025

- Led the ideation and systematic game design, spearheading a project that resulted in well-balanced game mechanics.
- Independently designed the main character and hand drawn the animation for a 8 side of with an isometric perspective. Lead the character design for 3 distinct game NPCs and creates animations using **Adobe After Effects**, resulting in a cohesive visual style.
- Conducted 15-hour playtest session to improve gameplay based on gathered feedback to refine user/player experience.
- Collaborated with the UI/UX lead to propose and improve the 4-game User interface, such as menu and dashboard UI using **Unity**. Directed and drawn 6 cut-scenes utilizing film and screen writing theories for Steam releases.

SKILLS

Technical

- **Programming Languages and Tools:** Python, Java, HTML, CSS, JavaScript, Swift, C#
- **Engines & Framework:** Flask, JSwing, LibGDX, Unity
- **Libraries:** requests, NLTK, bs4, pandas, Jackson

Design

- **Design Tools:** Rhino 3D, Procreate, Adobe Suit (Ps, Ai, Pr, Me, An, Id), Blender, Unity, Sketchup, Resprite, ProTools
- **External Specialties:** UI/UX Design, Game Art (Character Designs and Animation), Product Design, Illustration, Sound Design
